1. Summary of Significant Accounting Policies

A. Accounting Practices

The accompanying financial statements of Texas FAIR Plan Association (the "Association") have been prepared on the basis of accounting practices prescribed or permitted by the Texas Department of Insurance.

The state of Texas requires insurance companies domiciled in the state of Texas to prepare their statutory financial statements in accordance with the National Association of Insurance Commissioner's ("NAIC") *Accounting Practices and Procedures Manual* subject to any deviations prescribed or permitted by the Texas Insurance Department.

Reconciliations of net income and policyholder's surplus between the amounts reported in the accompanying financial statements (Texas basis) and NAIC statutory accounting practices follow:

Net Income as reported	(\$ 24,924,306)	(\$ 1,854,238)

B. Uses of Estimates

The preparation of financial statements requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, and disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenue and expenses during the period. Actual results could differ from these estimates. Significant estimates included in the accompanying financial statements are the reserve for losses, loss adjustment expenses, and premiums ceded.

C. Accounting Policies

Direct and ceded premiums are earned over the terms of the related policies or reinsurance contracts, respectively. Unearned premium reserves are established to cover the unexpired portion of premiums written. Such reserves are computed by pro rata methods for both direct and ceded business. The Association has a minimum policy premium of \$100.

Expenses incurred in connection with acquiring new insurance business, including such acquisition costs as sales commissions, are charged to operations as incurred. Expenses incurred are reduced for ceding allowances received or receivable.

In addition, the company uses the following accounting policies:

- 1) Short-term investments are stated at historical cost, which approximates market value.
- 2) Unpaid losses and loss adjustment expenses include an amount determined from individual case estimates and loss reports, and an amount, based on past experience, for losses incurred but not reported. Such liabilities are necessarily based on assumptions and estimates and while management believes the amounts are adequate, the ultimate liabilities may be in excess of or less than the amounts provided. The methods for making such estimates and for establishing the resulting liabilities are continually reviewed and any adjustments are reflected in the period determined.

The estimated cost of loss and loss adjustment expense (LAE) attributable to insured events of prior years decreased by approximately \$190 thousand during 2016 and decreased favorable by approximately \$1.6 million during fiscal year ending 2015. Increases and decreases of this nature occur as the result of claim settlements during the current year, and as additional information is received regarding individual claims, causing changes from the original estimates of the cost of these claims.

The Company attempts to consider all significant facts and circumstances known at the time loss reserves are established. Due to the inherently uncertain process involving loss and loss adjustment expense reserve estimates, the final resolution of the ultimate liability may be different from that anticipated at the reporting date. Therefore, actual paid damages in the future may yield a material different favorable or unfavorable amount than currently reserved. While the Company believes that the estimated for loss and loss adjustment expense reserves are adequate as of September 30, 2016, there can be no assurance that the estimates and the extended period of time that it can take to settle claims may change the results of operations.

The Company does not issue any retrospective rated policies, as such, the net incurred increase or decrease related to prior years did not result in any direct accrual of additional premiums.
